Course Title: History of Midwifery

Credits: 3.0

Course Description: A broad exploration of the history, culture, and politics of midwifery in the United States throughout the 19th and 20th centuries. In this course, students look at the changes that took place in early medicine and dominant American culture that created a severe decline in midwifery care and the subsequent effects on childbearing women. Special attention to political topics such as the rise of obstetrics and decline of midwives, issues of licensing and education, the medicalization of childbirth, the natural childbirth movement, and the rise of homebirth midwifery help students understand the world they are preparing to practice in today.

Learning Objectives

Introduction to the [Midwives Model of Care](http://cfmidwifery.org/mmoc/define.aspx). [\(http://cfmidwifery.org/mmoc/define.aspx\)](http://cfmidwifery.org/mmoc/define.aspx)

Learning objectives are identified through the linking of MEAC Essential Competencies and the NCM Degree Qualification Profile.

Learning Activities

Read, listen to, watch assigned lesson materials.

Submit a written summary of current research.

Complete oral and/or written formative didactic assessments with final summative submission.

Identify and cite high-quality sources.

Use articulated reasoning while participating in an oral presentation, facilitated discussions and skills demonstrations.

Analyze a case study.

Conduct an interview and/or develop a survey

Create a timeline.

Complete a final exam.

Note: The clinical requirement of NARM /Clinical Skills is completed at any time throughout the ASM apprenticeship during actual clinical practice and is NOT a requirement to complete this academic course. Typical clinical manifestations of knowledge learned in this course are identified in the learning objective document above.

Evaluation Tools / Methods:

The minimum passing grade for all courses is a cumulative 70% / C-. Grades are not recorded until both the student and preceptor submit end of trimester evaluations and in the case of general education courses supervision is completed

All assignments for this course are evaluated using the following criteria:

1. *Responses to each didactic assessment are evaluated utilizing the NCM rubrics and degree level profile.*

2. *Answers should reflect a thorough review of the current literature regarding best current practices in midwifery care.*
3. *Non-plagiarized paraphrased answers from the text which demonstrate appropriate comprehension of the learning objective. (Formative Assessment) Students and preceptors are encouraged to work together until the student masters the information. (Summative Assessment)*
4. *Random evaluation of cited sources and page numbers for each written assignment.*

Course credit: One Academic credit equals approximately 15 hours of formal time plus 30 hours of additional study or homework. Formal time is defined as the amount of time taken to answer the Learning Objectives to the level of 80% for midwifery courses and 70% for general education courses and to complete any learning activities to the preceptor's satisfaction, including any time spent face to face with the preceptor. Informal time includes any time spent actively reading relevant sources and textbook/s, researching Learning Objectives, and studying for examinations.
